## **DETAILED ACTION**

### ***Specification***

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 7, line 4, the phrase "for instance" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-7 rejected under 35 U.S.C. 102(b) as being anticipated by Klausner et al., Patent #5,390,236.**

Regarding claim 1, Klausner teaches a procedure to transmit information in connection with telephone answering service which is provided by a mobile answer device in a mobile telephone system(Fig.17) characterized in the steps: that a calling subscriber is connected to the mobile answer device when a called subscriber can not be accessed and that the mobile answer device stores information which originates from the calling subscriber (col.9 line 62- col.10 line 2);

that, when the called subscriber establishes a connection to the mobile answer device to listen to recorded speech messages, a message is transmitted in parallel to the called subscriber, which message contains the stored information (col.10 lines 29-32).

Regarding claims 2 and 3, Klausner teaches the procedure as claimed in patent claim 1, characterized in that the stored information includes the calling subscriber's number, which is transferred automatically to the mobile answer device (Fig.10 and lines 29-32).

Regarding claim 4, Klausner teaches the procedure as claimed in patent claim 1, characterized in that the stored information contains an optional number, which is transferred by the calling subscriber to the mobile answer device (Fig.10 lines 29-32).

Regarding claim 5, Klausner teaches the procedure as claimed in claim 1 characterized in that the message is connected to an application at the called subscriber's.

Regarding claim 6, Klausner teaches the procedure as claimed in patent claim 5, characterized in that the application connects a number with a telephone list (col.10 lines 33-39)

Regarding claim 7, Klausner teaches the procedure as claimed in claim 1, characterized in that the message is transmitted by means of a short text message service, for instance SMS (Short Message Service) or USSD (Unstructured Supplementary Services Data) *[col.9 line 63- col.10 line 2; the caller entering his phone number to be displayed to the called party is a form of short text message service]*
